

# PERFECT POTATOES IN A FLASH

IN WINTER, THERE'S NOTHING BETTER THAN SMOOTH, RICH MASHED POTATOES TO SOAK UP THE DELICIOUS JUICES OF BRAISED AND SLOW-ROASTED MEAT DISHES. MASH HAS TO BE THE ULTIMATE COMFORT FOOD – WARMING, SUBSTANTIAL AND SATISFYING.

One of the great things about mash is that you can serve it as plain or as fancy as you like. That's also true of the many products available for those occasions when you just don't have the time – or the staff – available to prepare quality mash from scratch.

Krio Krush Basic Foods offers three speedy potato products from the US. Produced using the latest technology, they are produced by Basic American Foods (BAF), a long-established family-run company which specialises in dehydrated potato products for the foodservice market.

Potato Pearls Golden Extra Rich Mashed Potatoes is a complete, seasoned mashed potato product offering superior taste and texture. This product can go from packet to plate in minutes, and is guaranteed 'goof-proof', whether whisked by hand or prepared by machine. Just add boiling water for plain mashed potatoes, or add extra flavourings for an even better result.

BAF's Potato Granules are an economical instant mashed potato product designed to give a consistent result for

larger operations. It features added vitamin C for extra nutrition. It is prepared using a mixer, with the addition of water, salt, and – if desired – butter or margarine.

Krio Krush also offers BAF's Nature's Own Premium Hashbrown Potatoes. While hashbrowns are often associated with breakfast, they are actually incredibly versatile. Combine with sautéed vegetables, napolitana sauce and cheese as a side-dish for grilled meats; use as a 'pie lid' with any beef casserole; or add to wraps or frittata.

To prepare Nature's Own Hashbrown Potatoes, add hot water, allow to stand, then fry on both sides until golden. This product is especially designed to offer fresh potato flavour with maximum convenience.

Potatoes are an indispensable part of so many meals, and these products allow you to obtain a fast and consistent result.
